| D. Maximum building lot coverage based on lot sizes. | 45\% | 40\% | 40\% | 40\% | 40\% | 40\% | 40\% |

## Notes:

1. For additional density provisions, see CMC Sections 18.09.060 through 18.09.180.
2. Setbacks may be reduced to be consistent with average lot sizes of the development in which it is located. Notwithstanding the setbacks requirements of this chapter, setbacks and/or building envelopes clearly established on an approved plat or development shall be applicable.
3. Maximum building height: three stories and a basement, not to exceed height listed.
4. For parcels with an existing dwelling, a one timeone-time exception may be allowed to partition from the parent parcel a lot that exceeds the maximum lot size permitted in the underlying zone. Any further partitioning of the parent parcel or the oversized lot must comply with the lot size requirements of the underlying zone.
5. Average lot area is based on the square footage of all lots within the development or plat. The average lot size may vary from the stated standard by no more than five hundred square feet.
