Heidi – The revised traffic study was submitted via email on January 9th and followed up with paper copies (either the 9th or 10th).

Hi Sarah –

I have one more item to add to the list:

- We have a revised traffic report that replaces all of the previous reports and memos that we submitted. This will simplify it by combining multiple documents into one document. It also clarifies that the trip generation is based on the combined total of students in the building plus the two future portables.

We will get two printed copies of the revised report to you. Please insert the new report and pull out the entire previously submitted Section 7 and recycle those pages. The electronic version is attached. Please delete the old Section 7 PDF.

Let me know if you have any questions.

Thanks!

-Jeremy
