The original northeast corner of the South's downtown and claim was established by L. Farnsworth in 1839 as a post office site. The access roads of 10°-20' N 329° E to lanes and a 70°-10' S 69° W all lanes. The location was again documented by the county during the survey of Flemming road in 1886 (RD. 100, sec. 2, T. 171). In 1939 EPA survey crews indicated they located a fence corner in the position and the bearing thence to the intersection of the two roads was 195° 50' 37". The intersection point was found in 1953, 507 ft from the intersection of the two roads. The intersection of the two roads was found in 1953, 507 ft from the intersection of the two roads.
