Subject: (File #SHOR17-03) Shoreline Substantial Development Permit For Maintenance Dredging "Comments"
Date: Thursday, October 19, 2017 3:29:10 PM

Concerning the Notice of Application for (File #SHOR17-03) Maintenance Dredging.

One has learned not to assume anything with regard to Mill operation and maintenance activities.

None the less - Our Community boarding the Mill to the NW (Tidland Heights) would request this activity does not add to the already questionable noise levels of the evening/night/early morning hours. (8:00 P.M. - 8:00 A.M.)

Asking the Mill to observe limited reasonable noise levels during the evening hours has been an ongoing challenge.

Ideally this is an activity that is scheduled for the daytime hours and will not be an issue for anyone.

Regards
Peter - Tidland Heights neighbor

We recently received a notice dated 10-2-17 re this proposal and have two questions:

Why did the city not also contact us mill neighbors to ask for our comments before, as well as after, making an apparent decision of non significance?

Why would it cost \$355. to file an appeal? Most other appeals of government decisions cost nothing to file.

Thanks for your response,
Jim Hutchison

Good Afternoon:

We recently received a letter regarding upcoming dredging near our property.

Please provide some additional details:

Dates of the project, complete length

Time of day the work will progress

Noises/sounds or disturbances expected

Odors/smells expected

Responses to these questions may result in additional questions.

Thank you,

Amanda and Jorge Martinez
