Property: Determination of Non-Significance (DNS) for the Grass Valley Master Plan (SEPA18-06),
Cultural Resources Survey of the Eiford Property Project Area, Clark County, Washington

Re: Archaeology - Concur with Predetermination Survey, Add Inadvertent Discovery

Language to Permit

Dear Mr. Coppola:

We have reviewed the above cultural resources survey for the Grass Valley Master Plan project. No archaeological resources were identified. We agree that no further archaeological work is necessary at this time. If plans change and any development takes place outside of the areas surveyed during this cultural resources survey (see figure), further archaeological survey work should take place. The following inadvertent discovery procedures should be followed in case of an inadvertent find:

Should archaeological materials (e.g. bones, shell, stone tools, beads, ceramics, old bottles, hearths, etc.) be observed during project activities, all work in the immediate vicinity should stop and the State Department of Archaeology and Historic Preservation (360-586-3065), the County planning office, and the affected Tribe(s) should be contacted immediately. If any human remains are observed, all work should cease and the immediate area secured. Local law enforcement, the county medical examiner (360-397-8405), State Physical Anthropologist, Department of Archaeology and Historic Preservation (360-586-3534), the County planning office, and the affected Tribe(s) should be contacted immediately. Compliance with all applicable laws pertaining to archaeological resources (RCW 27.53, 27.44 and WAC 25-48) and human remains (RCW 68.50) is required. Failure to comply with this requirement could constitute a Class C Felony.

Thank you for the opportunity to review. Should you have any questions, please feel free to contact me.

Sincerely,

Gretchen Kaehler
Assistant State Archaeologist, Local Governments
