Hello Lezlee Grundy –

My name is Jim Hodges. I'm the Project Manager for the Lacamas Creek Sewer Pump Station project, the subject of SEPA 19-08 that you have received.

First, I want to make it clear that the Lacamas Creek Sewer pump Station will be constructed on the north side of NE 3rd Avenue, immediately west of Lacamas Creek and the existing Lacamas Trailhead Parking Lot. The city building that is on the west side of Cramer Lane, near your development, 3 Rivers Condos, is City of Camas Well #13. Camas has no current plans to do any construction work to Well #13, or to do any work that is likely to cause traffic to be routed through your development.

The only significant work that will be done near your home will be the installation of a pipeline on the north side of E. 1st Avenue, that will run from NE 3rd Avenue to the intersection of NE 2nd & Joy. Construction of this pipeline is not expected to occur until the Fall of 2020.

I would be happy to meet with your HOA at a time that is convenient for you to explain this project in more detail if you would like; or we could meet at City Hall, if you prefer.

Thanks Much, Jim

James Hodges

Dear Mr. Maul,

I too have concerns about how the residents of our 15-unit Three Rivers Homeowners Association will be impacted by your project. As a former Board Member (positions of President and Treasurer) and a home owner (18 years), I don't want to see construction vehicles using our private drive as a way of going down Cramer Lane and not doing a three point turn to go back up Cramer Lane. There are tracks already from non-home owner vehicles going through our private drive. My fear is it will become even more of an issue once construction starts. I'm concerned about any damage to our driveway but more importantly, we have many young children that play on the private drive and ride their bikes as well and I'm concerned for their welfare.

I've appended my input to the email Vicky Wessling (our current President) sent you. Her email is within the thread below. I strongly agree with her and wish to be another voice giving community input.

I appreciate the opportunity to give you feedback. If you need to follow up with me my contact information is:

Subject: Case # SEPA 19-08 - Public comment

Dear Mr. Maul:

I am responding to the SEPA Document 19-08 public comment period regarding the Determination of Non-significance for the construction of 2 new sewer pump stations, associated piping, outhouses, paving and sidewalks.

I was not able to retrieve information in SEPA 19-08 that pertained to local traffic-rerouting from private homes that access E. 1st Avenue, Joy Street and E. 3rd Avenue.

As a member of the Board of Directors for the Three River Homeowners Association, I want to express a concern regarding the impacted access for local residents. Our property ingress and egress access is onto E. 1st Avenue by a private driveway. Our west property line abuts SE Cramer Lane, which is adjacent to the existing City's water transmission pump house. The issue is a noticeable increase of traffic from city employees and contractors coming through our private driveway. Some of the traffic includes oversized vehicles using our private driveway as a circle drive from Cramer Lane to 1st Ave. This is causing a safety concern for Three River residents, including children.

In addition to safety concerns, we recently spent homeowner dues to reseal our private driveway and road gutters. The increased traffic will negatively effect the driveway.

An easy remedy to address this concern is to redirect project traffic from accessing our private driveway.

As the Responsible Official of this planning project, your review and consideration of this comment into SEPA 19-08 is appreciated.

Vicky Wessling
TRHOA Board of Directors
