**INTRODUCTION/PURPOSE/SUMMARY:** The recently installed water transmission main between the Slow Sand Water Treatment Plant at 32723 NE Lessard Road and the intersection of NE Ireland Road and NE 312<sup>th</sup> Avenue requires wetland monitoring due to disturbance at various stream crossings during construction. These requirements are mandated by US Army Corps of Engineers and Clark County. The monitoring period will be 5 years, from 2019 to 2023. HHPR has provided the attached professional services agreement to complete the required monitoring and reporting on behalf of the City.

**BUDGET IMPACT:** \$25,120 expenditure for 2019 and \$17,675 per year thereafter from 2020 to 2023 from the Storm-Capital Fund. The Storm-Capital budget has sufficient funds to complete this work.

**RECOMMENDATION/RECOMMENDED ACTION/ACTION REQUESTED:** Staff recommends this item be placed on the September 3, 2019 Consent Agenda for Council's consideration.
