File #:	REP 15-063	Version:	1	Name:	
Type:	Informational Report	Status:		Meeting Item	
File created:	1/22/2015	In control:		CITY COUNCIL WORKSHOP	
On agenda:	2/2/2015	Final action:			
Title:	<p>Lacamas Lake Water Quality Status</p> <p>Details: Council requested an update on the Lacamas Lake water quality status and testing. Currently there is no active testing on Lacamas Lake or tributary systems. The last update by Clark County was the Monitoring Report Lacamas Lake Annual Data Summary for 2007 (see attached). In 2010-11, the Department of Ecology gathered data in the Lacamas Basin tributaries to support work on developing a Total Maximum Daily Load (TMDL) for the basin. Discussion with Ecology anticipates that the TMDL will not be ready for public involvement and comment until 2017. Based on a discussion with Clark County staff, an effort similar to the 2007 study would cost in the neighborhood of \$10,000 to \$15,000 and may be helpful in developing trends in water quality over time. County staff noted that there is an active Vancouver Lake stakeholder group, which has similar concerns on algae, but there is not currently a stakeholder group for Lacamas Lake.</p> <p>Presenter: Eric Levison, Retiring Public Works Director</p>

Lacamas Lake Water Quality Status

Details: Council requested an update on the Lacamas Lake water quality status and testing. Currently there is no active testing on Lacamas Lake or tributary systems. The last update by Clark County was the *Monitoring Report Lacamas Lake Annual Data Summary for 2007* (see attached). In 2010-11, the Department of Ecology gathered data in the Lacamas Basin tributaries to support work on developing a Total Maximum Daily Load (TMDL) for the basin. Discussion with Ecology anticipates that the TMDL will not be ready for public involvement and comment until 2017. Based on a discussion with Clark County staff, an effort similar to the 2007 study would cost in the neighborhood of \$10,000 to \$15,000 and may be helpful in developing trends in water quality over time. County staff noted that there is an active Vancouver Lake stakeholder group, which has similar concerns on algae, but there is not currently a stakeholder group for Lacamas Lake.
