Transportation Corridors Studies Contract

Details: The attached scope and budget detail the work to be done by the HDJ Design Group team to provide a defined corridor alignment for the east/west arterial in the North Urban Growth Area (NUGA) and to address the corridor improvement needs for NE Everett/SR-500 and NE/NW 6th Avenue. The 2015-2016 Budget includes \$150,000 to complete these studies. As there is some interest in considering downtown mall streetscaping improvements on NE 3rd Avenue between Adams Street and Dallas Street in a fashion similar to NE 4th Avenue, this scoping includes work to provide a cursory look at the impacts and the necessary information to scope a traffic analysis for the 3rd Avenue project, if so desired. Due to this addition to the scope, the total amount of this contract is not to exceed \$159,257.

Presenter: James Carothers, Engineering Manager

Recommended Action: Staff recommends this item be placed on the August 17, 2015 Consent Agenda for Council's consideration.
