### Sewer Transmission Main Consultant Contract Supplement

Details: The STEP sewer transmission main route bisects areas of archaeological significance. Efforts were made during project design to keep these areas of potential archaeological finds to a minimum. There are two areas that require additional archaeological investigation and artifact curation. The cost of this additional consultant work is \$175,646. This additional cost is covered by the Public Works Trust Fund loan for this project.

Presenter: James Carothers, Engineering Manager

Recommended Action: Staff recommends this item be placed on the November 2, 2015 Consent Agenda for Council's consideration.
